

PawLenX, Inc.

Digital Marketing Workflow and Growth Strategy

Purpose

To establish a practical marketing system for building audience, trust, waitlist demand, partnerships, and pre-launch revenue before the app is released.

Version 1.0

1. Executive Direction

At PawLenX, Inc., our immediate responsibility is to build the market before the app is fully launched. The app will support pet owners with pet wellness education, nutrition insights, training support, AI assistance, community features, and pet-focused entertainment. The digital marketing department must create visibility, trust, demand, and early revenue before the app is released. This department is not only responsible for posting on social media. It is responsible for building a pet-owner media ecosystem around PawLenX. Every content activity should move people through a clear growth path: attention, trust, community, lead capture, offer testing, revenue, and app launch.

Core growth sequence

Stage	Primary Goal	Department Action
Attention	Reach pet owners and pet lovers.	Funny pet videos, AI pet skits, trending formats, reels, shorts, memes, and shareable graphics.
Trust	Position the brand as helpful and reliable.	Live educational videos, nutrition and training tips, careful health education, newsletter, and consistent brand voice.
Community	Make followers participate.	Pet-of-the-week, comments, polls, UGC submissions, story questions, challenges, and live Q&A.
Lead Capture	Move followers into owned channels.	Waitlist, newsletter, free checklist, DM keyword codes, email capture landing pages, and beta invites.
Revenue	Generate money before app launch.	Affiliate offers, sponsored content, digital products, local pet business partnerships, wellness snapshot, and newsletter sponsorship.
Launch Readiness	Prepare a warm audience for the app.	Beta community, feature polls, early access, launch countdown, testimonials, and referral campaigns.

2. Department Priorities

- Grow our audience across TikTok, Instagram, YouTube Shorts, Facebook Reels, LinkedIn, email, and community channels.
- Create consistent AI videos, live face-to-camera videos, image graphics, carousels, newsletters, and outreach messages.
- Convert social media attention into email subscribers and app waitlist members.
- Build trust around pet health, nutrition, training, behavior, and pet-owner education without making medical claims.
- Coordinate clearly with the backend/AI video engineer so AI video production is fast, accurate, and brand-safe.
- Use Instagram and LinkedIn outreach to build partnerships with pet brands, local pet businesses, creators, trainers, groomers, shelters, and potential investors.
- Generate early revenue through affiliate offers, sponsored content, digital products, local lead generation, and newsletter placements.
- Report performance every week with data and clear next actions.

Working rule

Do not chase every trend randomly. Use trends only when they fit our brand: pet wellness, nutrition, training, humor, pet-owner lifestyle, AI pet entertainment, and Pet TV.

3. App Vision and Product Expansion

The app should eventually become a full pet-care ecosystem, not only a single-feature product. The digital marketing department should use content to test which features the audience wants most before full development.

Future App Feature	What It Can Do	Marketing Angle to Test Now
Pet profile	Store pet name, breed, age, weight, sex, activity level, food, allergies, behavior concerns, and reminders.	Ask followers to create “mini pet profiles” through polls and lead forms.
Nutrition status support	Help owners track feeding, treats, weight changes, food type, body condition, hydration, and nutrition habits.	Post content on feeding mistakes, healthy weight awareness, and body condition education.
AI pet wellness assistant	Answer general pet-care questions, suggest what to monitor, and help owners prepare questions for professionals.	Create AI demo-style videos showing how a pet owner might use an assistant for education.
Training library	Offer puppy basics, leash walking, recall, crate training, calm feeding, cat enrichment, and behavior support modules.	Post short live training tips and “one-minute training” videos.
Body condition and weight tracker	Allow users to log weight and photos over time and see trends.	Use “Is my pet gaining weight?” educational campaigns.
Pet TV	Offer calming videos, bird videos for cats, dog relaxation music, sleep screens, and enrichment playlists.	Test YouTube Pet TV clips and measure watch time.
Community	Pet profiles, photo contests, pet-of-the-week, challenges, and owner groups.	Run weekly community posts and UGC contests now.
Marketplace	Recommend products, services, digital guides, and partner offers.	Test affiliate products and sponsored content before launch.
Local services directory	List groomers, trainers, sitters, boarding facilities, vets, and pet-friendly businesses.	Begin local outreach and featured business posts.
Smart reminders	Vaccines, grooming, feeding, medication reminders, exercise, and training reminders.	Use graphics and newsletter sections on “what to remember this week.”
Premium subscription	Offer advanced nutrition tracking, training plans, Pet TV, premium guides, and member-only Q&A.	Build a founding-member waitlist and test paid digital products.

4. Content Pillars

Pillar	Purpose	Examples
Funny pet content	Fast reach, shares, and comments.	Pet fails, “if pets could talk,” POV videos, captions, memes, reaction clips.
AI pet skits	Content volume, entertainment, repeatable characters.	Talking dog assistant, cat critic, pet nutrition detective, puppy podcast, fictional pet courtroom.
Pet health and nutrition education	Trust and app positioning.	Body condition, feeding routines, hydration, treats, weight trends, common food questions.
Training and behavior	Prepare the market for training features.	Leash pulling, jumping, recall, crate training, separation anxiety education, cat enrichment.
Live face-to-camera content	Human trust and authority.	Daily pet tip, weekly Q&A, myth-busting, behind-the-scenes app update.
Community and UGC	Participation and loyalty.	Pet of the Week, caption contest, pet story submissions, before/after training stories.

Pillar	Purpose	Examples
Newsletter and graphics	Owned audience and repeat engagement.	Pet Wellness Digest, infographics, carousels, checklists, product picks, beta update.
Partnership and revenue content	Pre-launch income.	Affiliate product education, local business features, sponsored posts, digital product offers.

5. Achievable Weekly Content Output

The target below is realistic for a small team if content is repurposed across platforms. The department should not create completely new content for every platform. One core idea should be turned into several assets.

Asset Type	Weekly Target	How It Should Be Used
AI short videos	5-7 per week	TikTok, Instagram Reels, YouTube Shorts, Facebook Reels.
Live face-to-camera clips	2-4 per week	Trust-building, education, app updates, myth-busting.
Image graphics/carousels	3-5 per week	Instagram, LinkedIn, Pinterest, newsletter, stories.
Newsletter	1 per week	Drive repeat engagement and bring followers into owned audience.
Stories/polls	Daily	Questions, quizzes, UGC prompts, waitlist reminders.
Cold outreach	40-60 contacts per week	Instagram creators, pet brands, local services, LinkedIn professionals.
Community prompts	2-3 per week	Pet-of-the-week, caption contest, “comment your pet’s name.”
Revenue tests	1-2 per week	Affiliate post, digital product offer, sponsored pitch, or local partner feature.

6. AI Video Production Workflow

The backend/AI video engineer will support AI video generation. The digital marketing department is responsible for deciding what should be created, why it should be created, who it is for, what the message should be, and how the video should be used. The engineer should not be asked to guess the marketing goal.

AI video request process

1. Marketing identifies a content idea from trends, audience comments, newsletter questions, app feature testing, or campaign needs.
2. Marketing completes an AI Video Request Brief using the template below.
3. Marketing submits the request to the backend/AI video engineer through the agreed channel: email, Slack, ClickUp, Trello, Notion, or shared spreadsheet.
4. Engineer creates draft video assets and returns them in the requested format.
5. Marketing reviews for brand fit, accuracy, clarity, platform suitability, captions, AI labeling, and compliance.
6. Marketing provides one consolidated revision note. Avoid multiple scattered revisions.
7. Final approved video is posted, repurposed, archived, and tracked in the content tracker.

AI Video Request Brief Template

Field	What Marketing Must Provide
Request ID	Example: AIV-2026-001.
Campaign or pillar	Funny pet skit, nutrition education, training, Pet TV, waitlist, product test, newsletter support.

Field	What Marketing Must Provide
Objective	Follower growth, comments, shares, waitlist signups, affiliate click, app feature validation.
Target viewer	New dog owner, cat owner, busy pet parent, puppy owner, senior pet owner, trainer, groomer, local business.
Video hook	First 2 seconds. Example: “Your dog is not dramatic. He may be bored.”
Core message	One clear takeaway. Avoid stuffing many ideas into one short video.
Scene description	Characters, pet type, environment, emotion, movement, background, props.
Script/voiceover	Exact words or bullets. Include pronunciation notes if needed.
Visual style	Realistic, cartoon, AI mascot, documentary, meme-style, clean educational, Pet TV calming.
Length	15 sec, 30 sec, 45 sec, 60 sec, or long Pet TV clip.
Format	Vertical 9:16 for TikTok/Reels/Shorts; square 1:1 if needed; horizontal 16:9 for YouTube/Pet TV.
CTA	Follow, comment, join waitlist, download checklist, DM keyword, visit link, submit pet video.
Compliance notes	AI label needed, no diagnosis, no fake testimonial, no copyrighted assets, affiliate disclosure if applicable.
Deadline	Requested delivery date and whether it is urgent.
Success metric	Views, shares, comments, saves, watch time, waitlist signups, affiliate clicks.

Sample request message to the backend/AI video engineer

Copy/paste template

Subject: AI Video Request AIV-[Number] - [Topic]

Please generate a vertical 9:16 AI video for [platform/campaign]. The goal is [objective]. Target viewer is [audience]. Hook: “[hook].” Core message: [one sentence]. Scene: [description]. Voiceover/text overlay: [script]. Style: [style]. Length: [duration]. CTA: [CTA]. Please label as AI-generated where required and avoid medical diagnosis claims. Draft needed by [date].

AI video ideas to request first

Series Name	Example Video Ideas	Why It Can Work
If Pets Could Talk	“My dog explains why the shoe deserved it.” “Cat reviews the new food bowl.”	Funny, relatable, easy to repeat weekly.
Pet Nutrition Detective	“The case of too many treats.” “Why the bowl is full but the diet is not balanced.”	Connects humor to nutrition education.
Pet Owner Mistakes	“3 feeding mistakes new dog owners make.” “One mistake that makes leash pulling worse.”	Mistake-based hooks often earn saves and comments.
Pet Myth Court	“Is grain-free always better?” “Do cats need entertainment?”	Debate format encourages comments.
Pet TV Test Lab	“Calming screen for anxious dogs.” “Bird TV for indoor cats.”	Tests future Pet TV demand and watch time.
AI App Preview	“Imagine asking your pet wellness assistant this question.”	Softly prepares users for app launch.

7. Live Face-to-Camera Video Workflow

AI video can increase production volume, but human video builds trust. The department should produce consistent live or face-to-camera content to make the company feel real, credible, and accessible.

Live video formats likely to perform well

Format	Example Hook	Best Use
Mistake video	“Three mistakes pet owners make without realizing it.”	High saves and shares.
Myth-busting	“Pet myth: more food does not always mean more love.”	Education and debate.
POV format	“POV: your dog is bored, not stubborn.”	Relatable and entertaining.
Before/after explanation	“Before you blame behavior, check these three things.”	Training and behavior education.
Checklist video	“Do this weekly pet wellness check.”	App positioning and lead magnet.
Reaction/explainer	“Here is what this common pet behavior may mean.”	Works with trends, but avoid diagnosing.
Storytime	“A pet owner asked us this question...”	Human connection and comments.
Challenge	“Try this 3-day calm feeding challenge.”	Community participation.
Behind the scenes	“What we are building for pet owners.”	Waitlist and app trust.
Live Q&A	“Ask us about feeding, training, and pet wellness.”	Trust, lead capture, and content ideas.

Live video topic bank

Category	Topics
Pet nutrition	How to tell if feeding routine needs attention; common treat mistakes; meal timing; hydration; body condition awareness; reading pet food labels at a basic level.
Pet weight and wellness	Why weight tracking matters; weekly pet check; signs to monitor; when to talk to a veterinarian; healthy routine building.
Training	Leash pulling; recall basics; crate training; jumping; calm feeding; puppy routine; consistency mistakes.
Behavior	Boredom vs stubbornness; separation anxiety education; enrichment ideas; cat scratching; multi-pet home challenges.
Pet TV and enrichment	Why pets need stimulation; calming screens; indoor cat enrichment; background sounds; how to test what your pet enjoys.
App-building updates	Why we are building the app; what feature should come first; beta-user call; “help us design this with your feedback.”
Community topics	Pet name stories; funniest pet habit; pet of the week; adoption stories; “show us your pet’s routine.”
Monetization-friendly topics	Product comparison education; grooming tools; training tools; pet cameras; cleaning products for pet owners; affiliate disclosure included.

Simple live video script structure

- Hook: Say the problem in the first two seconds.
- Context: Identify the pet owner who should care about the topic.
- Value: Give one useful tip, checklist, example, or mistake to avoid.
- Trust statement: Remind viewers that health concerns should be discussed with a veterinarian.
- Call to action: Ask viewers to comment, DM a keyword, join the waitlist, or submit a question for the next video.

8. Newsletter System

Social media platforms do not belong to us. The newsletter gives the company an owned audience that can be used for app launch, beta testing, product offers, sponsorship, and community building.

Newsletter name options

- Pet Wellness Digest
- The Healthy Pet Brief
- Pet Parent Weekly
- Paws & Wellness
- Smart Pet Parent Newsletter

Weekly newsletter structure

Section	Purpose	Example
Opening note	Human voice from the brand.	"This week we are focusing on pet weight and daily routines."
One pet wellness tip	Educate and build trust.	"Track treats separately from meals for one week."
One training tip	Prepare audience for app training features.	"Practice recall indoors before expecting outdoor success."
One funny pet feature	Keep it light and shareable.	Pet meme, AI pet skit, pet-of-the-week.
Community question	Collect content ideas.	"What is your pet's strangest habit?"
App/waitlist update	Move audience toward launch.	"Beta waitlist is open for early users."
Offer or partner link	Generate revenue.	Affiliate product, digital checklist, sponsored pet business feature.
CTA	Drive one action.	"Forward this to a pet parent" or "DM WELLNESS for the checklist."

Newsletter lead magnets

- Free Pet Wellness Starter Checklist
- Dog Body Condition Awareness Guide
- Pet Feeding and Treat Tracker
- 7-Day Calm Feeding Challenge
- Puppy Routine Starter Sheet
- Indoor Cat Enrichment Checklist
- Pet TV Trial Playlist
- Pet Health Questions to Ask Your Vet

Newsletter production workflow

8. Monday: select newsletter theme from current campaign or audience questions.
9. Tuesday: write draft and select one graphic, one video link, and one CTA.
10. Wednesday: review for accuracy, claims, brand tone, and links.
11. Thursday: schedule newsletter and prepare matching social posts.
12. Friday: review open rate, click rate, replies, unsubscribes, and conversions.

9. Image Graphics and Carousel Workflow

Image graphics are important because not every follower will watch video. Graphics also work well for Instagram carousels, LinkedIn posts, Pinterest, newsletters, story posts, and paid lead magnets.

Graphic types to create weekly

Graphic Type	Example	Use
Educational carousel	"5 signs your pet's routine may need adjustment."	Instagram, LinkedIn, Pinterest, newsletter.

Graphic Type	Example	Use
Checklist graphic	“Weekly pet wellness check.”	Saveable post and lead magnet preview.
Myth vs fact	“Pet nutrition myth vs fact.”	Comments and shares.
Quote/meme card	“My dog has never met a snack he did not trust.”	Engagement and humor.
Pet-of-the-week graphic	Featured follower pet.	Community and UGC.
Product pick graphic	Affiliate product education with disclosure.	Revenue.
App teaser graphic	“Coming soon: pet nutrition tracking.”	Waitlist conversion.
Live event flyer	Weekly Q&A announcement.	Attendance and reminders.
Newsletter promo graphic	“Get the Pet Wellness Digest.”	Email capture.

Recommended graphic sizes

Platform/Use	Recommended Size	Notes
Instagram feed/carousel	1080 x 1350 px	Best for vertical feed space.
Instagram story/Reel cover	1080 x 1920 px	Use safe margins for text.
TikTok/Reels/Shorts cover	1080 x 1920 px	Large text, clear topic.
YouTube thumbnail	1280 x 720 px	Use high contrast and few words.
LinkedIn post image	1200 x 627 px or square	Professional, less meme-heavy.
Pinterest pin	1000 x 1500 px	Checklist and guide content.
Newsletter header	600-1200 px wide	Keep file size reasonable.

10. Instagram Growth: DM Keywords, Cold DM, and Community

Instagram should be used for short-form content, community building, DMs, UGC collection, and lead capture. The department should use both public posts and direct messages.

DM keyword code system

Each campaign should have a simple keyword that followers can comment or DM to receive a resource. This can be automated if we use an approved DM automation tool; otherwise, it can be handled manually at first.

Campaign	Keyword	What the Follower Receives
Pet Wellness Checklist	WELLNESS	Free checklist and newsletter signup link.
Feeding tracker	FEEDING	Pet feeding and treat tracker.
Training challenge	TRAIN	7-day simple training challenge.
Pet TV test	PETTV	Pet TV sample playlist or early access interest form.
Beta app waitlist	BETA	Early access sign-up page.
Pet-of-the-week	FEATURE	Submission instructions and permission form.

Instagram cold DM targets

- Micro pet influencers with engaged audiences.
- Pet owners who comment regularly on our posts.
- Local groomers, trainers, pet stores, shelters, and boarding businesses.
- Pet product companies that may want sponsored content or affiliate placement.
- Veterinary educators or pet professionals who may join a live session.

- Rescues and adoption pages for community partnerships.

Instagram DM scripts

Use Case	Message Template
UGC permission	Hi [Name], we loved your video/photo of [pet name]. We are building a pet wellness community and would like permission to feature it on our social pages with credit to you. Please reply “YES” if you give us permission to repost it.
Micro-influencer collaboration	Hi [Name], we are building a pet wellness and nutrition app for pet parents. Your content fits the kind of pet community we are building. Would you be open to a small collaboration or early ambassador conversation?
Local business partner	Hi [Name], we are building a pet-owner audience in [city/region] and would like to feature useful local pet services. Would you be open to discussing a simple featured post or partner listing?
Pet brand partnership	Hi [Name], our company is growing a pet-owner community around wellness, nutrition, training, and Pet TV. We are looking for aligned pet brands for affiliate or sponsored content partnerships. Who is the best person to discuss this with?
Waitlist conversion	Thanks for your comment. We are building an app to help pet owners with wellness, nutrition, training, and Pet TV. You can join the early access list here: [link].

11. LinkedIn Growth and Outreach

LinkedIn should be used more professionally than Instagram. The goal is to build credibility, partnerships, business relationships, recruiting opportunities, and investor/industry awareness. Content should focus on pet industry growth, product development, partnerships, app updates, AI in pet care, and founder/team credibility.

LinkedIn content themes

- Why we are building a pet wellness and nutrition platform.
- Lessons from speaking with pet owners, groomers, trainers, and local pet businesses.
- Behind-the-scenes app development updates.
- AI video and AI assistant development in pet care.
- Pet owner problems we are solving.
- Partnership opportunities for pet professionals and pet brands.
- Short educational posts about responsible pet wellness technology.
- Newsletter signups and beta waitlist announcements.

LinkedIn outreach targets

Target	Why Contact Them	Possible Ask
Pet brand founders	Sponsorship, affiliate, co-marketing.	Partnership call.
Veterinarians/vet educators	Credibility and educational input.	Guest live session or advisor conversation.
Dog trainers	Training content and app modules.	Content collaboration.
Groomers and pet-service owners	Local services directory and lead generation.	Featured listing pilot.
Shelters/rescues	Community and goodwill.	Pet feature campaign.
App/product professionals	Product feedback and hiring network.	Feedback conversation.
Pet investors/accelerators	Future fundraising awareness.	Introductory update and newsletter signup.

LinkedIn message templates

Use Case	Message Template
Connection request	Hi [Name], I am working on a pet wellness, nutrition, training, and Pet TV platform. I would like to connect with others building in the pet care and consumer health space.
Partnership follow-up	Thank you for connecting. We are currently building our pre-launch pet-owner community and testing partnerships with pet brands and pet professionals. Would you be open to a brief conversation about possible collaboration?
Expert live invite	We are hosting short educational live sessions for pet owners and would value your perspective on [topic]. Would you be open to joining a 20-minute session or providing one practical tip we can share with credit?
Local business listing	We are testing a local pet services feature and would like to include trusted providers. Would you be interested in being considered for an early featured listing?
Investor/industry update	We are building a pet wellness app with nutrition tracking, training support, AI assistance, community, and Pet TV. We are currently growing the audience and collecting beta users. I would be glad to send a short update deck when ready.

12. Waitlist Landing Page and Link-in-Bio Funnel

Every platform should send people to a simple link-in-bio structure. The goal is to avoid losing followers after they view a post. Each link should lead to a clear next action and should be trackable.

Link-in-Bio Button	Purpose	Where It Should Lead
Join the beta waitlist	Main app launch lead capture.	Landing page with email, pet type, main concern, and beta interest.
Get the free Pet Wellness Checklist	Newsletter signup and lead magnet.	Email form with automatic delivery of checklist.
Submit your pet to be featured	UGC and community growth.	Form requesting pet name, story, media upload, and permission.
Try Pet TV sample	Test future Pet TV demand.	YouTube playlist or landing page with viewing feedback form.
Partner with us	Business development.	Simple page for brands, groomers, trainers, shelters, and pet services.
Read the newsletter	Owned audience growth.	Newsletter signup archive or latest issue.
Shop our recommended tools	Affiliate revenue.	Product page with proper disclosure.

Minimum landing page fields

- Name and email address.
- Pet type: dog, cat, other, multiple pets.
- Main interest: nutrition, weight, training, anxiety, Pet TV, general wellness, local services.
- Permission to receive app updates and newsletter.
- Optional: interest in beta testing or paid Pet Wellness Snapshot.

Conversion rule

Every post does not need to sell. However, every day should include at least one clear path to the waitlist, newsletter, DM keyword, UGC submission, partner inquiry, or offer.

13. Pre-Launch Revenue Plan

The company should begin testing revenue before the full app is ready. This helps validate demand and reduces reliance on a single launch event.

Revenue Channel	What to Offer	First Implementation Step
Affiliate marketing	Pet products, cameras, grooming tools, toys, training tools, cleaning products, pet insurance, digital services.	Choose 5-10 products aligned with content pillars and disclose affiliate relationships.
Sponsored content	Reels, stories, newsletter placement, product feature, local business spotlight.	Create a one-page media kit with audience size, niche, and starter pricing.
Digital products	Feeding tracker, training challenge, pet wellness checklist, pet sitter sheet, cat enrichment guide.	Launch one free lead magnet and one low-cost paid product.
Pet Wellness Snapshot	Educational report based on pet age, weight, diet, activity, and owner concerns.	Pilot manually with disclaimers and feedback form.
Newsletter sponsorship	Featured partner section in weekly newsletter.	Offer introductory placement to local pet businesses or pet brands.
Local lead generation	Send leads to groomers, trainers, sitters, boarding facilities, pet stores.	Build a simple directory interest form and pitch 10 businesses.
Pet TV monetization	YouTube content, sponsorship, future premium in-app library.	Publish test playlists and track watch time.
Community membership	Early access, weekly Q&A, challenges, discounts, app beta access.	Start free; test paid founding-member option later.

14. Viral-Style Topic Bank

The following topics are designed to be practical, repeatable, and aligned with our app. They should be adapted into AI videos, live videos, graphics, newsletters, and short posts.

Hook formulas to use repeatedly

- Mistake hook: “Stop doing this if your pet...”
- Curiosity hook: “Most pet owners miss this simple sign...”
- POV hook: “POV: your dog is not stubborn; he is...”
- Checklist hook: “Do this 30-second pet check every week.”
- Challenge hook: “Try this for 3 days and observe your pet.”
- Myth hook: “Pet myth that needs to stop...”
- Story hook: “A pet owner asked us this, and it matters.”
- Comment hook: “Comment your pet’s name and we will suggest a content idea.”

Theme	Hooks and Topics
Funny pet POV	POV: your dog hears the treat bag; POV: your cat is your landlord; If your puppy had a podcast; My dog explaining why the sock was suspicious.
Mistakes	Three feeding mistakes; one leash mistake; why your pet may be bored; treats that quietly add up; mistakes new puppy owners make.
Myth-busting	Myth: all pets need the same amount of food; myth: cats do not need enrichment; myth: a tired dog is always a well-trained dog.
Checklists	Weekly pet wellness check; signs to monitor before calling the vet; what to track when changing food; new puppy starter checklist.
Training	One-minute recall drill; calm feeding routine; leash walking start; crate training first steps; reward timing.

Theme	Hooks and Topics
Nutrition	Treat tracker; hydration habits; food transition; body condition awareness; questions to ask before changing food.
Pet TV	What does your cat watch? Does calming music help your dog relax? Bird TV test; bedtime pet screen.
Community	Comment your pet's name; show us your pet's funniest habit; pet of the week; caption this; what would your pet's job be?
App building	What feature should come first? Would you use pet nutrition tracking? Help us test Pet TV. Join beta.

15. Weekly Operating Calendar

Day	Main Work	Required Output
Monday	Trend review, analytics review, content planning, newsletter theme selection.	Content calendar, AI video request list, live topics, newsletter outline.
Tuesday	Scriptwriting, graphic planning, DM list building, engineer requests.	AI briefs, live scripts, carousel drafts, outreach list.
Wednesday	AI video review, graphic creation, newsletter drafting.	Draft videos, graphics, newsletter draft, captions.
Thursday	Live video recording, post scheduling, DM outreach.	3-5 live clips, scheduled posts, 20-30 DMs.
Friday	Publishing, engagement, partnership outreach, weekly report.	Weekly KPI report, top content analysis, next-week improvements.
Weekend	Light engagement and community posts.	Stories, polls, comment replies, UGC collection.

16. 30/60/90-Day Implementation Plan

Timeline	Primary Focus	Deliverables
First 30 days	Build foundation and start consistent posting.	Waitlist page, content tracker, 50 content ideas, 20 AI video briefs, first newsletter, first lead magnet, daily stories, weekly report.
Days 31-60	Increase output and begin partnership testing.	Micro-influencer outreach, local business outreach, affiliate testing, live Q&A series, Pet TV pilot clips, 2 digital products.
Days 61-90	Scale what works and prepare app audience.	Beta waitlist push, newsletter sponsorship test, UGC campaign, app feature polls, first partner package, early user research group.

17. Weekly KPI Report Template

The department should submit this every Friday. The report should be short, data-based, and action-oriented.

Category	Metrics to Report	Decision to Make
Audience	Followers gained by platform; reach; impressions.	Which platform deserves more effort next week?
Content	Number of AI videos, live videos, graphics, newsletters, and posts published.	Did we meet output goals?
Engagement	Likes, comments, shares, saves, replies, DMs.	Which format created the strongest reaction?
Lead capture	Newsletter signups, waitlist signups, DM keyword requests.	Which CTA converted best?
Revenue	Affiliate clicks, sales, sponsorship leads, digital product sales.	Which offer should be repeated or stopped?

Category	Metrics to Report	Decision to Make
Community	UGC submissions, pet features, live attendance, questions received.	What topics should become content next week?
Partnerships	DMs sent, replies, meetings booked, partner status.	Which relationships need follow-up?
Top lessons	Top 3 posts and why they worked.	What should be replicated?

18. Content Tracker Fields

The department should maintain one shared tracker. This can be done in Google Sheets, Airtable, Notion, Trello, ClickUp, or another approved tool.

Field	Purpose
Content ID	Unique tracking number for every asset.
Content pillar	Funny, AI skit, nutrition, training, live, newsletter, graphic, partnership, app.
Platform	TikTok, Instagram, YouTube, Facebook, LinkedIn, email, Pinterest.
Hook	First line or first visual idea.
Script/caption	Approved copy.
Asset owner	Digital marketer, designer, live host, AI engineer.
Status	Idea, briefed, in production, needs review, approved, scheduled, posted.
CTA	Follow, comment, DM keyword, waitlist, newsletter, affiliate, purchase.
Compliance check	AI label, affiliate disclosure, UGC permission, no medical claims.
Performance	Views, likes, comments, saves, shares, clicks, signups.
Next action	Repeat, modify, boost, turn into newsletter, pitch sponsor, retire.

19. Brand Safety, Permissions, and Claim Rules

The department must grow quickly, but growth must not create legal, credibility, or medical-risk problems. These rules apply to all content.

- Do not repost another person’s video unless we have written permission or proper licensing.
- Save permission screenshots or emails for every UGC asset used.
- Label AI-generated or AI-assisted realistic content where required by the platform.
- Do not impersonate a veterinarian, pet expert, creator, or real person.
- Do not use copyrighted music outside approved platform tools or properly licensed sources.
- Do not claim the app diagnoses, treats, cures, or replaces veterinary care.
- Use educational language: “may,” “can help track,” “ask your veterinarian,” “for education only.”
- Disclose affiliate relationships, sponsored posts, free products, and paid collaborations clearly.
- Do not use fear-based health claims to drive sales.
- Do not show unsafe pet handling, dangerous feeding, or harmful training methods.

20. Immediate Assignments for the Department

Assignment	Owner	Due
------------	-------	-----

Assignment	Owner	Due
Create shared content tracker with the fields listed in this document.	Digital marketing lead	This week
Create waitlist landing page and link-in-bio structure.	Marketing + web/product team	This week
Prepare first lead magnet: Pet Wellness Starter Checklist.	Digital marketing	This week
Submit first 10 AI video request briefs to backend/AI video engineer.	Digital marketing	This week
Record first 5 live face-to-camera short videos.	Marketing/live host	This week
Create first 5 image graphics/carousels.	Digital marketing/design	This week
Draft first weekly newsletter.	Digital marketing	This week
Build Instagram and LinkedIn outreach lists.	Digital marketing	This week
Send first 40 outreach messages.	Digital marketing	Next 7 days
Submit first Friday KPI report.	Digital marketing	Friday

21. Employee Execution Checklist

This checklist should be used by the employee or department member responsible for execution each week.

Weekly Item	Done?	Notes
Content calendar completed by Monday.		
At least 5 AI video briefs submitted to backend/AI video engineer.		
At least 3 live face-to-camera videos recorded.		
At least 3 graphics or carousels created.		
Newsletter drafted, reviewed, and scheduled.		
At least one DM keyword campaign active.		
Instagram outreach completed.		
LinkedIn outreach completed.		
UGC permissions saved.		
Affiliate/sponsor disclosures checked.		
Waitlist and newsletter signup numbers recorded.		
Friday KPI report submitted.		

22. Final Direction

Our goal is not only to post on social media. Our goal is to build a trusted pet-owner audience before the app launches, learn what pet owners want, create community, and generate early revenue.

The department should use AI video for scale, live video for trust, image graphics for clarity, newsletters for owned audience growth, Instagram for community, LinkedIn for partnerships, and outreach for revenue. Every week should produce visible growth, measurable learning, and practical movement toward app launch.

Operating principle: Attract attention, build trust, grow community, collect leads, test offers, generate early revenue, and prepare users for the app launch.

Employee acknowledgment and review cadence

The employee responsible for this department should review this plan, begin execution immediately, and bring questions or needed resources to the weekly marketing review.

Item	Response
Employee name	
Date reviewed	
First week execution date	
Main tools needed	
Questions or blockers	
Weekly report due day	Friday

Appendix A: Growth Perspective Assessment

This plan is robust enough to support early growth if it is executed consistently. The strategy will work best when the department treats content as a growth system, not as random posting. Each post should have a purpose: reach, engagement, trust, lead capture, partnership, or revenue testing.

The most important improvement is to give the employee clear starting topics, weekly campaigns, AI video request examples, live-video topics, newsletter themes, and outreach actions. These additions make the plan more achievable and easier to implement immediately.

What must happen for the plan to achieve its aim

Growth Requirement	Why It Matters	Weekly Standard
Consistency	Social media growth rewards repeated posting and repeated testing.	Post or repurpose content at least 5 days per week.
Clear audience focus	Pet owners must quickly understand that PawLenX helps them care for pets better.	Every post should speak to dog owners, cat owners, or pet-service partners.
Strong hooks	The first 2 seconds decide whether people keep watching.	Every video must start with a problem, curiosity line, mistake, POV, or challenge.
Lead capture	Followers alone do not guarantee app users.	Push newsletter, waitlist, DM keyword, or beta signup daily.
Human trust	AI video gives scale, but real people build credibility.	Record 3-5 live or face-to-camera videos weekly.
Feedback loop	Audience behavior should shape the app and content plan.	Review analytics and comments every Friday.
Revenue testing	Pre-launch income validates demand and builds business confidence.	Test one offer monthly: affiliate, guide, sponsor, local listing, or paid snapshot.

Appendix B: First 8-Week Starter Content Calendar

This calendar gives the department practical topics to begin with while the app is still being built. Each week should produce AI videos, live videos, graphics, newsletter content, DM engagement, and at least one waitlist or revenue action.

Week	Theme	AI Video Ideas	Live Video Topics	Graphic/Newsletter Asset	DM Code	Main CTA
Week 1	Pet Wellness Basics	"If pets could ask for a wellness check." / "The dog who hides treats during diet week."	3 signs your pet routine may need attention; weekly pet wellness check; why pet weight tracking matters.	Weekly Pet Wellness Checklist	WELLNESS	Free checklist + newsletter signup
Week 2	Nutrition and Feeding	"My cat reviewing the new food bowl." / "Dog detective investigates too many treats."	Feeding mistakes; treat tracking; meal timing; foods to ask your vet about.	Pet Feeding and Treat Tracker	FEEDING	Download tracker + join waitlist
Week 3	Training and Behavior	"POV: your dog is bored, not bad." / "Puppy podcast: why I ignore recall."	Leash pulling; jumping; recall basics; calm feeding.	7-Day Simple Training Challenge	TRAIN	Challenge signup + future training feature poll
Week 4	Pet TV and Enrichment	"Cat requests bird TV." / "Dog rating calming music."	Why pets need enrichment; indoor cat activities; calming routines; separation support.	Pet TV Trial Playlist	PETTV	Pet TV interest form + YouTube playlist
Week 5	Pet Weight Awareness	"The case of the shrinking treat jar." / "Dog explains why walks are optional."	Body condition awareness; weekly weigh-in routine; how treats add up.	Pet Weight Tracker	WEIGHT	Paid tracker test or free beta download
Week 6	New Pet Parent Support	"Puppy owner survival meeting." / "Cat onboarding report."	First-week puppy routine; safe home setup; questions new owners ask.	New Pet Parent Starter Sheet	PUPPY	Lead magnet + affiliate starter-product test
Week 7	Community and UGC	"Pet of the week announces company policy." / "If pets ran the office."	Feature followers' pets; pet name stories; funniest habits; owner lessons.	Pet Feature Submission Form	FEATURE	Collect UGC permission + community growth

Week	Theme	AI Video Ideas	Live Video Topics	Graphic/Newsletter Asset	DM Code	Main CTA
Week 8	App Feature Testing	"What if your pet had a digital profile?" / "AI assistant helps prepare vet questions."	Which feature should we build first; nutrition tracker demo; Pet TV demo; training library poll.	Beta Feature Interest Survey	BETA	Waitlist push + beta tester segmentation

Appendix C: Ready-to-Use Topic Library for the Meantime

The following topics can be used immediately before the app launches. They should be rotated across TikTok, Instagram Reels, YouTube Shorts, Facebook Reels, LinkedIn, newsletter, and graphics. The department should not wait for perfect production quality; the priority is consistent testing and learning.

Category	Immediate Topics
Funny/relatable pet content	POV: your dog hears the treat bag; if cats wrote performance reviews; when your puppy discovers mud; dog math: one treat equals zero treats; cat judging your life choices; when the pet camera exposes the truth; pet reaction to diet week; pets during Zoom meetings; if dogs had group chats; the cat who owns the house.
Pet nutrition education	Three feeding mistakes many owners make; how treats can affect daily intake; why measuring food matters; wet food vs dry food basics; when to ask your vet about diet; food transition mistakes; hydration reminders; reading feeding instructions; meal timing tips; why one diet does not fit every pet.
Pet weight and wellness	How to start a weekly weight log; why pet weight creeps up slowly; body condition awareness; belly view and side view basics; how to track progress with photos; what to monitor before calling the vet; why "cute and chunky" can become a problem; treat audit challenge; signs routine may need adjustment; questions to ask your veterinarian.
Training and behavior	Recall mistake to avoid; leash pulling basics; jumping on visitors; calm feeding routine; crate comfort; boredom vs stubbornness; separation routine; enrichment for indoor cats; chewing and redirection; one-minute training drill.
Pet TV/enrichment	Bird TV for cats; calming screen for dogs; aquarium relaxation; background sound test; enrichment while working from home; leave-on playlist test; Pet TV feedback poll; what visuals do cats respond to; bedtime routine screen; rainy-day indoor enrichment.
Community engagement	Pet of the week; caption this pet; funniest sleeping position; show us your pet's side-eye; name your pet's job title; what would your pet text you; pet birthday shoutouts; rescue story feature; before/after grooming feature; comment your pet's name for a personality prompt.
App testing and waitlist	Which feature should launch first; would you use a feeding tracker; would you use Pet TV; what is your biggest pet-care challenge; beta tester invitation; pet profile mockup; nutrition tracker concept; training library poll; AI assistant demo; local pet service directory interest.
Revenue testing	Best starter products for new dog owners; grooming tools we are testing; pet camera comparison; feeding tracker bundle; sponsored local groomer spotlight; affiliate product education; digital pet planner; pet sitter instruction sheet; training challenge PDF; newsletter sponsor slot.

Appendix D: Live Video Topic Bank and Hook Examples

Live and face-to-camera videos should be simple, useful, and repeatable. Most should be 30-90 seconds. Longer live sessions can be 15-30 minutes once per week. The goal is to build trust and move viewers to comments, DMs, newsletter signup, or the waitlist.

Category	Video Hook	Execution
Nutrition	"Stop guessing your pet's feeding routine."	Explain why owners should track food, treats, water, and weight trends. End with DM FEEDING.
Weight awareness	"Most pet owners miss gradual weight gain."	Show how to use a weekly log and photo routine. Avoid diagnosis. End with DM WEIGHT.
Training	"Your dog may not be stubborn; the cue may be unclear."	Teach one simple recall or leash principle. End with comment "TRAIN."
Behavior	"Bored pets often look like bad pets."	Explain enrichment, routine, and observation. End with a question asking owners what their pet does when bored.
Pet TV	"We are testing pet-friendly screen"	Ask followers whether their dog or cat watches screens. Invite Pet TV

Category	Video Hook	Execution
	content.”	testers.
Founder/brand trust	“Why we are building PawLenX.”	Explain the company mission in simple language and invite beta testers.
App feature testing	“Would this feature help you?”	Show or describe a planned feature and ask followers to vote.
Community	“Today’s pet-owner question is...”	Answer one audience question, then invite more questions for the next video.
Partner spotlight	“A trainer/groomer/vet educator taught us this.”	Use expert collaboration to build trust. Tag partner when approved.
Myth-busting	“Pet myth that needs more context...”	Correct common oversimplifications without attacking viewers. End with “save this.”

Appendix E: AI Video Brief Examples for the Backend/AI Video Engineer

The digital marketing department should submit complete briefs so the backend/AI video engineer can generate useful videos without guessing. Each request should include the purpose, target audience, script, scene description, format, length, captions, and CTA.

Request ID	Pillar	Topic	Target Viewer	Creative Direction	Output Needed
AIV-001	Funny pet skit	Dog explains why he needs more treats	Dog owner / broad pet audience	Animated talking dog in kitchen. Dog gives a fake legal defense for eating extra treats. End with “Track treats this week.”	20-30 sec vertical video with captions; CTA: DM FEEDING.
AIV-002	Nutrition education	Treats count too	Pet owners trying to manage weight	Friendly AI pet nutrition detective investigates treat jar. Include simple message: treats should be tracked separately from meals.	30 sec vertical; educational disclaimer; CTA: get free feeding tracker.
AIV-003	Pet TV test	Calming dog background	Busy dog owners	Loopable calming living-room scene with soft movement, slow pacing, no harsh flashing. Designed for dogs while owner works.	60 sec sample; CTA: join Pet TV tester list.
AIV-004	Cat enrichment	Cat requests bird TV	Cat owners	Funny cat character sends a memo asking for bird/squirrel screen time. Transition into enrichment tip.	25 sec vertical; CTA: comment CATTV.
AIV-005	App feature teaser	Future pet profile	Potential beta users	Show fictional pet profile screen concept: age, weight, food, activity, wellness notes. Make clear it is a concept preview.	20 sec vertical; CTA: join beta waitlist.
AIV-006	Training humor	Puppy podcast: recall training	New puppy owners	AI puppy podcast host explains why “come” is confusing if used inconsistently. End with one training tip.	30 sec vertical; CTA: DM TRAIN.

Appendix F: Newsletter and Graphic Topic Calendar

Newsletter and graphics should support the same weekly campaign as social media. This creates repetition and helps followers remember the brand. Every newsletter should include one tip, one community element, one CTA, and one link back to the waitlist or resource.

Weekly Theme	Newsletter Subject	Graphic/Carousel Asset	CTA
Pet Wellness Basics	“Your weekly pet wellness check”	Checklist graphic: food, water, activity, weight, behavior	Join newsletter + download checklist
Feeding Routine	“Track treats for one week”	Carousel: 5 feeding routine mistakes	DM FEEDING for tracker
Training Basics	“One training cue to practice this week”	Carousel: calm feeding or recall basics	DM TRAIN for challenge
Pet TV Test	“Does your pet watch screens?”	Graphic: Pet TV tester invitation	Join Pet TV sample list
Weight Awareness	“Small changes can matter over time”	Tracker preview graphic	Download tracker or join beta
New Pet Parent	“First-week pet routine checklist”	New pet parent starter sheet	Download starter sheet

Weekly Theme	Newsletter Subject	Graphic/Carousel Asset	CTA
Community Week	“Pet of the week”	UGC feature card template	Submit pet feature form
App Feature Week	“Help us decide what to build first”	Feature poll graphic	Complete feature interest survey

Appendix G: Instagram and LinkedIn Outreach Targets for Growth

Outreach should be done carefully and respectfully. The department should track who was contacted, date contacted, response, follow-up date, and outcome. Do not spam. Personalize the first line when possible.

Channel	Target	Purpose	Achievable Weekly Target
Instagram	Micro pet influencers	UGC, collaboration, giveaway, pet feature	10-15 per week
Instagram	Local groomers/trainers/pet stores	Local partnership, featured business, referral pilot	10 per week
Instagram	Engaged followers	Waitlist, newsletter, pet submission	20-30 per week
LinkedIn	Pet brand founders/marketing managers	Affiliate, sponsor, newsletter placement	10 per week
LinkedIn	Veterinary educators/pet professionals	Guest live, educational input, advisor conversation	5 per week
LinkedIn	Local business owners	Directory pilot and lead generation	10 per week
Email	Affiliate programs and pet brands	Revenue partnerships	5-10 per week

Appendix H: First 30 Days Execution Checklist

This is the minimum execution plan for the first month. If the department follows this checklist, PawLenX will begin gathering audience signals, lead data, and content performance information before the app is ready.

Week	Execution Focus	Expected Output
Week 1	Set up tracker, link-in-bio, waitlist, newsletter form, UGC permission form, and first 20 AI video briefs.	Foundation live; first 5-7 posts published; first lead magnet draft.
Week 2	Post daily, submit AI briefs, record 3 live videos, publish first newsletter, start DM keyword campaign.	First 25-40 pieces of repurposed content; first newsletter signups.
Week 3	Launch UGC campaign, contact micro-influencers, publish Pet TV sample, test one affiliate product.	First UGC submissions; first partnership conversations.
Week 4	Review data, double down on best hooks, create one paid digital product or expanded free lead magnet.	Monthly report with growth, leads, top content, and next priorities.

Appendix I: Content Quality Control Before Posting

- Does the first two seconds clearly hook the viewer?
- Is the content aligned with pet wellness, nutrition, training, Pet TV, community, or app growth?
- Is the video short enough for the platform?
- Are captions readable on a phone?
- Is the CTA clear but not too aggressive?
- If AI-generated or AI-assisted, is the content labeled when needed?
- If sponsored or affiliate, is the relationship disclosed clearly?
- If using a user-submitted pet video, do we have written permission?
- Does any health content avoid diagnosis, treatment, cure, or replacement of veterinary care?
- Was the content added to the tracker with date, platform, pillar, CTA, and performance fields?
